

**River & Stream Conditions  
In Hot Springs County  
Effective May 8, 2018**

**Inflows into Boysen over the next ten days will be lower than expected.**

**The release flow from Boysen Reservoir will be reduced to 2250 cfs on Tuesday May the 8<sup>th</sup>.**

**Adjustments upward may be necessary when the snow melt runoff begins in the next few weeks.**

**County stream drainages are low at this time.**

**Snow melt runoff from the high elevations at the west end of Hot Springs County has not yet begun showing signs of how much snowpack is up high.**

**We will continue to monitor both situations as we move through May & June.**
